

portable refractometer

This tool has been developed to check the concentration of the water-soluble cutting fluids for metals during processing.

- ↪ Reading range: from 0 to 15% Brix
- ↪ "Concealed" adjusting nut to prevent accidental re-adjusting. Easy zeroing and lock.
- ↪ Automatic temperature adjustment model (ATC).
- ↪ Double-jointed of the shutter to ensure a perfect cover of the prism.
- ↪ High brightness to allow for ease of reading in normal light conditions.

The refractometer is stored in a box containing the instructions for use, the adjusting screwdriver and a water vial to carry out zeroing.
